Chubb's Fish Club

THE FISHING ROD

MANUFACTURER.

I hereby guarantee to the purchaser of every Chubb's Fish Club which has stamped upon it our Trade Mark that it is made by skilled workmen out of the best material, and of its parts. And I do warrant it for the space of One Year. And will replace, free of charge, any part that proves defective, or breaks while in actual service, if the breakage is in any way due to fault of material or workmanship.

Signed *Wm. H. Chubb* POST MILLS VT.

To Supersede all Previous Lists.

PLEASE bear in mind that we are the **MANUFACTURERS** of nearly all goods in this Catalogue, and that they are made expressly for our "**RETAIL DEPARTMENT.**"

Those articles described in this List, that are not our make, are made to order, and are carefully selected, and anglers can depend upon these goods being just as represented.

We endeavor to fill all orders promptly; but in the Spring and Summer months, when every one "goes a-fishing," it is not always possible to send rods **AT ONCE**; and if anglers will please bear this in mind, and send in their orders **EARLY**, they will greatly oblige us, save themselves unnecessary delay, and keep everybody good-natured.

Send in your rods to be repaired before April 1st, if possible.

ELEVENTH EDITION.

TO OUR PATRONS.

Please Read these Instructions Carefully. Address all Communications
to T. H. CHUBB ROD CO., POST MILLS, VT.

Correspondence.—Address your letters carefully, give your own name and address plainly; also, if more than one sheet of paper is used, put your name on each, and number the sheets. These instructions may seem needless, but we are in constant receipt of letters without address, name not signed, or letters containing money not sealed.

Remittances.—The safest modes of remitting money are by Express, Draft, Money Order, or by Registered mail. Always mention amount of money enclosed.

Express Money Orders.—These are absolutely safe, and can be obtained at any express office at the following low rates :

<i>Any amount not over \$5.....</i>	<i>5 cents</i>	<i>Over \$20 to \$30</i>	<i>12 cents</i>
<i>Over \$5 to \$10.....</i>	<i>8 cents</i>	<i>Over \$30 to \$40</i>	<i>15 cents</i>
<i>Over \$10 to \$20</i>	<i>10 cents</i>	<i>Over \$40 to \$50</i>	<i>20 cents</i>
<i>Over \$50, proportionately.</i>			

Post-Office Money Orders.—These are also safe, and, when sent, have them made payable at “Post Mill Village,” which is our office as given in the post-office guides. Money orders from foreign countries made payable at “West Fairlee” post-office. Money orders can be procured at the following low rates :

<i>Any amount not over \$5.....</i>	<i>5 cents</i>	<i>Over \$15 to \$30</i>	<i>15 cents</i>
<i>Over \$5 to \$10.....</i>	<i>8 cents</i>	<i>Over \$30 to \$40</i>	<i>20 cents</i>
<i>Over \$10 to \$15</i>	<i>10 cents</i>	<i>Over \$40 to \$50</i>	<i>25 cents</i>

Postal Notes and Stamps.—Although Postal Notes are not absolutely safe, they are very handy to pay for small orders. United States postage stamps accepted in payment of goods to the amount of \$1, but we cannot use *foreign* stamps or *Canadian* bills.

Ordering Goods.—As far as possible order all articles in this list by number, and give name of same. Use our order sheets when practicable,

and take special pains in signing your name and address, and in giving directions how goods are to be shipped, whether by plain *mail*, *insured*, or by *express*. If goods are to be sent by plain mail, and our order sheets are used, draw a line across the word *mail* only, and if you want them *insured*, draw a line across the word *insured* also; if to be sent by express, draw a line across the word *express* only, and leave the others unmarked. Goods in lots less than one-half dozen will be charged by the piece.

Goods by Mail.—Most goods in this Catalogue can be sent by mail as merchandise, anywhere in the *United States* or *Canada*, at the rate of one cent per ounce, up to four pounds in weight. When ordering goods sent by mail, please to enclose amount of postage, unless goods are advertised prepaid. In all cases where goods are ordered sent by mail, money to pay for same must be sent with order. If too much money is sent, it will be returned to you. All goods sent by mail, unless *insured*, are at purchaser's own risk.

Goods by Express.—Two or more rods or large packages can generally be sent by express cheaper than by mail.

C. O. D. by Express.—We send goods by express, C. O. D., with privilege of examining, but parties so ordering must in all cases send \$2 as a guaranty of good faith and to defray express charges in case goods are returned to us. The money advanced in such instances will be deducted from amount of C. O. D. bill. In no case will we send goods to parties not known to us, unless money accompanies the order. You will find it much cheaper to remit the whole amount, as you thus save the cost of return express charges on money. In all cases where money accompanies the order, if the goods do not prove to be entirely satisfactory, the same can be exchanged or money will be refunded when so desired. If more money is sent than is necessary to pay for goods, it will be returned to you.

Goods Exchanged.—We will exchange any goods in this list, when returned to us within ten days of receiving same, you to pay all express or mail charges.

Special Goods.—Customers *may* be charged extra for turned stock or trimmings when they differ in shape or dimensions from our regular goods. *No special goods, or goods made to order, when they differ from our regular*

goods, will be exchanged under any consideration, and in no case can we take goods manufactured by other parties in exchange for our own.

Sending us Packages.—In sending us packages of any description, always put your own name and address on same, so we may know from whom it came; and, if sent by mail, have no letter or other written matter inside, as that subjects it to letter postage and also makes the sender liable to a heavy fine; and if sent by express, prepaid, ten cents must be added to the express company's rates (and paid to them) to pay cost of getting goods from station to our place. All express matter via "Thetford" or "Ely" on the Pasumpsic Railroad.

Telegraph Address.—All telegraph communications to be sent via "North Thetford."

Acknowledge Receipt of goods, and inform us if satisfactory and received in good condition. We are always pleased to hear from our patrons in regard to catch of fish, working of Rods, Reels, etc. You will also confer a favor upon us by giving the names of your angling friends, and recommending our goods to them, if they have proved satisfactory to you. Any information you may want that is in our power to give will be promptly and cheerfully accorded.

Shall We Send by Mail or Express?

We pack Rods so as to be sent safely by mail, and, when ordered sent by mail, the amount necessary to pay postage and insurance must be enclosed, but we cannot send Tackle, like Reels, Lines, Flies, etc., in same box; these are nearly all sent with mail, prepaid; and if you wish package insured, you must enclose 10 Cents for same extra above that sent for insured mail for the Rod. When Rod is ordered by express we can put in Tackle, or two or more Rods can be put in same box.

CHUBB'S INSURANCE TURTLE

Guarantees their Safe Arrival and in Good Condition.

INSURE YOUR PACKAGES!

OWING to a recent decision of the P. O. Department, we cannot send FISHING RODS by REGISTERED MAIL, their decision being that no package that is too large to go in the LOCKED MAIL POUCH can be Registered. Fishing Rods are too long, but can be sent by plain mail as heretofore.

Wishing that our goods may reach our customers as cheaply as possible, and safe, we have decided to do what Registration did not do, that is to GUARANTEE or INSURE their arrival to the proper destination, and in good condition.

10 Cents Insures all Fishing Rods that can be sent by mail.

10 Cents Insures all other packages that can be sent by mail, whose value does not exceed \$20.

Chubb's Hexagonal or Six-Strip Split-Bamboo Rods.

Chubb's "Trade Mark" Split-Bamboo Rods are unexcelled for balance, workmanship, and in the quality of material. The above cut is a correct representation of the bamboo used in these rods, which is carefully selected from a large stock, many times finding but a few in a bundle of fifty, and anglers may easily understand why the cheap grade of rods now put upon the market are so uncertain; why one may sometimes prove to be first-class and the next one from the same lot may prove to be spongy or brittle, and after short usage become worthless. We wish our customers to always bear in mind that all articles upon which we place our Trade Mark are warranted to give satisfaction, and that we replace free of charge anything that does not prove to be as represented.

EXTRA JOINTS AND TIPS FOR SIX-STRIP RODS.

Price of Extra Tips, Nickel Trimmings	\$2.00	German-Silver Trimmings	\$2.25
Price of Extra Joints, Nickel Trimmings.....	3.00	German-Silver Trimmings	3.50
Price of Extra Butts, Nickel Trimmings.....	5.00	German-Silver Trimmings.....	6.00

We cannot make extra joints and tips for these rods after the rod has been sent, unless the ferrules that go on the tip or joint are sent to us, so as to get the size; for if there is a very little variation in the size of ferrules, they will not fit properly: it is much better to return the whole rod.

All rods in this list will have stamped upon reel-seat or butt-cap our registered "Trade Mark."

We make all rods from the butts of selected Calcutta bamboo; none of the enamel is taken off in finishing or in fitting ferrules. These rods have

our hexagonal cap and welt ferrules, which are far superior to the round cap; are nicely wound with fine silk, and finished with Chubb's improved varnish, which is impervious to water, making them water-proof; these rods are made to order and hand-finished; made by good workmen, and nothing is left undone that will promote their strength, balance, durability or beauty. We have many testimonials from anglers who have thoroughly tested our rods, and speak in high praise of their merits. Each and every rod is warranted, and any joint or other parts that do not prove entirely satisfactory will be replaced free of charge.

TAKE NOTICE.

All Six-Strip rods have Chubb's Hexagonal Cap and Welt Ferrules, with solid metal stoppers, and Chubb's metal Reel-seat, unless otherwise stated. Butts or hand-grasps are wound with cane; all rods have nice grooved wood forms, which keep the joints straight and safe from accident. And all, with the exception of the Salmon and Combination Rods, are put in our *New Rod Case*, which is covered with Leatherine, and has caps and handle. All rods with nickel-plated trimmings will be made with dowels, unless otherwise ordered. All rods with German-Silver trimmings will be made without dowels and with our water-proof ferrules, unless ordered with dowels; all rods have two tips.

THE KING OF RODS.

EIGHT-STRIP SPLIT-BAMBOO RODS.

Our new Eight-Strip Split-Bamboo Rod has proved to be the "King of all Rods;" being nearly round, its action is much better, they are stronger and more durable and we believe they are unequaled.

The Trout Fly Rods are made with eight-strip butt and joint; tips are six-strip and corners slightly rounded. The tips used in these rods are very small and are nearly round when made of six-strip. All other rods are made of eight-strip throughout.

With our short reversible butt or hand-grasp, by which the reel can be used either above or below the hand; length of short butt, 12 inches; wound with cane, and has reel-seat; length of rod, 10½ feet, one joint for butt, one second joint, two tips, for trout fly-rod; weight of rod complete, 8½ ounces. One joint for butt, one second joint, two tips, for black bass rod; weight of rod complete, 11½ ounces. Fly rod is ringed, wound with silk. Bass rod has tie guides wound with silk, welt ferrules.

We can give these rods our hearty recommendation. By using this short butt we get two well-balanced and perfect rods, and also have the advantage of using the reel either above or below the hand, which will be appreciated by anglers in the different methods of casting for bass and trout, and has met with favor with a large class of anglers who on a fishing trip wish to be prepared for trout or bass without the trouble of carrying several rods. By referring to page 28, the angler can see the style of this rod in Lance-wood.

"HENSHALL COMBINATION."

Same style as the Chubb Combination. Combines the Henshall Black Bass Casting Rod; length, 8 feet 3 inches; weight, 8 ounces; and the Henshall Black Bass Fly; length, 10 feet 3 inches; weight, 8 ounces; has reversible hand-grasp.

"RAYMOND COMBINATION."

No. 39—Six-strip, German-silver trimmings.....	\$24.00
No. 39-N—Six-strip, Nickel-plated trimmings.....	20.00
No. 39-8—Eight-strip, German-silver trimmings.....	28.00
Boxing and insured mail.....	.70

Same style as the Chubb Combination. Combines Trout Fly-Rod, 10 feet in length; weight, 6½ ounces; and Bait Rod of 9 feet in length; weight, 7½ ounces. Fly part makes a fine rod for trout fly fishing. Bait part is just right for trout fishing in mountain streams, trolling, or black bass fishing. Has very light reversible butt with *Reel-Bands* and hand-grasp wound with fine cord.

Inlaid Cedar Grips.

We can make nearly all of our Six-strip Split-Bamboo Rods with Cedar Inlaid Grip, if so desired, at same price. The cut shows a Rod with Cedar inlaid.

Trunk Rod.

Nos. 49 and 49½, same as Nos. 48 and 48½; heavier, weight, 12 oz., with reel-seat above hand and tie guides; extra tip fits in third joint, making 9-foot rod.

The "RAYMOND" Cane or Walking-Stick Rod.

(ROD AND CANE COMPLETE.)

This is entirely different from any other cane rod made. Rod part is all concealed in Cane, which is made of bamboo, and is but a trifle larger than the ordinary cane and of the usual length, elegant in appearance and a safe protection to the Rod.

(LANDING NET HANDLE.)

After the Grip is taken off and the Rod part removed, the remainder can be used for Landing Net handle. We make a folding Landing Net, with socket to fit handle, that can be carried in pocket; or, we can also fit to same our collapsing Landing Net frame. The handle also carries the extra tip.

(ROD.)

The Rod part is finely balanced, and for anglers who wish to go light as possible and still have everything of the best and safely protected, will find this an elegant outfit, and will be much pleased with the Rod.

DESCRIPTION.

Four-joint; 10 feet in length; for trout fly fishing, with extra tip and adjustable butt, weight, 6 ounces. The extra tip is a little shorter, making a fine Trout Bait or light Bass Rod.

SIX-STRIP SPLIT-BAMBOO RODS.

To compete with the cheap Split-bamboo rods in the market we have made a new grade, which we do not warrant or place upon them our "Trade Mark," but simply say we believe them to be equal to and at a less price than any cheap grade in the market.

These rods are three-joint and have two tips each, silk ringed and lapped, hand-grasp wound with cane, metal reel-seat and put up in grooved wood form.

CHUBB'S ALL LANCE-WOOD

AND Ash and Lance-Wood Fishing Rods.

All rods in this List will have stamped upon reel-seat or butt-cap our registered "Trade Mark."

All our Lance-wood is selected and imported by our own agents; and, using so large a quantity as we do in the manufacture of all grades of fishing rods, we are enabled to place in these rods well-seasoned and selected stock, straight-grained, and free from knots. We believe that, with the exception of Split-bamboo, good Lance-wood is the "par excellence" of all wood for fishing-rod purposes, having that power of elasticity combined with strength we believe, to a greater degree than any other wood used in the manufacture of rods.

We leave all Lance-wood in its natural color, and finish with Chubb's improved varnish, which is impervious to water, making them water-proof. These rods are well made and well balanced, have Chubb's best trimmings, solid metal reel-seat, well-fitting ferrules, and are first-class in every respect. We pack rods so as to be sent safely by insured mail. Two or more rods can be sent cheaper by express. These rods will be made with dowels, unless otherwise ordered, but will make without dowels when so ordered, at same price.

CHUBB'S

Greenheart Rods.

We have had frequent calls for Greenheart rods in the past, so will make the following patterns in Greenheart: Nos. A, B, A $\frac{1}{4}$, B $\frac{1}{4}$, A $\frac{1}{2}$, B $\frac{1}{2}$, C, C $\frac{1}{2}$, C $\frac{3}{4}$, CC, D, D $\frac{1}{2}$, D $\frac{3}{4}$, DD, E $\frac{1}{2}$, F, G $\frac{1}{2}$, H $\frac{1}{2}$, P, P $\frac{1}{2}$; Nos. 0, 1, 2, 3, two-joint rods, and Nos. 1, 2, 3, valise rods; Nos. 40, 40 $\frac{1}{2}$, 41, 41 $\frac{1}{2}$, 43, 43 $\frac{1}{2}$, 44, 44 $\frac{1}{2}$, 45, 45 $\frac{1}{2}$, 46, 46 $\frac{1}{2}$.

Prices are the same as for all Lance-wood rods.

In ordering these rods be sure and state "Greenheart," or the regular Lance-wood will be sent.

In answer to the many inquiries we have received from anglers in regard to Greenheart and Lance-wood, we will here say that Greenheart is by many preferred to any other wood, but our experience with it has been that, although tough and strong, it is more apt to crook and become set than Lance-wood, and after usage has not that elasticity or recovery that good Lance-wood has, and we have never found any wood that in strength, elasticity and wear is superior or equal to first quality Lance-wood for rods, with the exception of Split-bamboo, which, if properly made, out of selected stock, stands at the head.

With our short reversible butt or hand-grasp, by which the reel can be used either above or below the hand; length of short butt, 12 inches; wound with cane, and has reel-seat; length of rod, 10½ feet, one joint for butt, one second joint, two tips, for trout fly-rod; weight of rod complete, 8½ ounces. One joint for butt; one second joint, two tips, for black bass rod; weight of rod complete, 11½ ounces. Fly rod is ringed, wound with silk. Bass rod has tie guides wound with silk, welt ferrules, grooved wood form in cloth case.

We can give these rods our hearty recommendation. By using this short butt we get two well balanced and perfect rods, and also have the advantage of using the reel either above or below the hand, which will be appreciated by anglers in the different methods of casting for bass and trout, and has met with favor with a large class of anglers who on a fishing trip wish to be prepared for trout or bass without the trouble of carrying several rods.

Rod is three-joint, 10 feet in length regular, or 10½ feet double-handed; weight, 8 ounces; 2 tips; put up in grooved wood form in cloth case.

This rod is made after suggestions by Henry P. Wells, in *Forest and Stream* of October 8th, 1891, in which he favored for a ladies' rod one of medium weight and with extra butt, double handed. Thinking it a good idea, we have made one like the above cut, which can be used single or double handed as required.

REVERSIBLE BUTT OR HAND-GRASP.

This butt-piece is made by having two ferrules inserted inside of hand-grasp, one in each end. These ferrules are of the same size, so that the center ferrule on the butt end of the first joint will fit either end, and by simply turning the hand-grasp you can have the reel above or below the hand, which will be appreciated by anglers in the different methods of casting for black bass. It is also used to make a combination black bass and trout fly rod, by having different joints which fit the same hand-piece. It is made of light wood, whipped with cane; has a solid metal reel-seat, and makes a nice hand-grasp. Length, 12 inches. Two center ferrules go with butt, which fit the ferrules inside; also has metal stopper for one end.

**HEXAGONAL CAP AND WELT FERRULES**

FOR SIX-STRIP BAMBOO RODS.

Our Hexagonal Cap Ferrules are far superior to the round cap, as it obviates the necessity of trimming off the corners of the bamboo, thus giving greater strength and durability to the joint or tip, by preserving the enamel on the bamboo unbroken. It also adds to the appearance of the rod, as it harmonizes with the general make-up.

**CHUBB'S PATENT FUNNEL OR TUBE TOP.**

No. 1.

No. 2.

Cut No. 1 is a longitudinal or sectional view of our patent Funnel Top, which is put together without the use of solder, by cutting a deep annular groove or seat on the inner end of the head; the small end of dowel is inserted in this groove, and is secured thereto by driving swedging tool into the center hole, which forces the metal outward, thereby flanging or spreading the inserted end of the dowel and securely fastening or dovetailing it in the annular groove. This top, being put together wholly without the use of solder, can easily be removed from the tip of a fishing-rod, when necessary, by heating, without danger of unsoldering the top. This top is secured by Letters Patent No. 277,230, granted May 8, 1883. All parties are hereby warned not to manufacture the same, under penalty of the law.

REELS.

In ordering reels, please to order by number; also number of yards, and if in brass or nickel-plate.

There is some complaint among anglers that reels do not hold the number of yards of line that they are advertised to hold. We will here say that they are measured to hold the smallest size line, and that a medium size line is about twice as large as the smallest size, therefore for a reel to hold 50 yards of medium size line, you should get an 80 or 100-yard reel, and for one to hold 100 yards, a 150 or 200-yard reel.

We will send any of these reels by mail, postage paid, upon receipt of price; those who want package insured must send ten cents extra for same.

(INSIDE OF REEL NOS. 24 AND 25.)

Something New in the Construction of Click Reels.

(REEL NOS. 24 AND 25, NOT RAISED PILLAR.)

These we have designed especially for the Trout fisherman, and are so constructed as to make the bearings absolutely "sand-proof;" consequently there is no possible chance for wear or for the reel to get out of order. These reels we make both in German-silver and Aluminum, and our cuts illustrate the reels as a whole and in parts. The axle of spool is made hollow and fits like a sleeve over steel bearing on left hand plate, thus taking the strain from off the screws, which so frequently work loose by the wrenching motion of the handle when fast to a fish. Click and spring are of steel. To oil the reel, remove the screw that holds handle. Reel has safety bands.

“Henshall Van Antwerp” Black Bass Reel.

(Patented Sept. 27, 1887, No. 370,684.)

PUT UP IN LEATHER CASE.

Price..... \$15.00

The following is what Dr. J. A. Henshall says about CHUBB'S HENSALL VAN ANTWERP" REEL, in his description of Tackle used for Black Bass fishing, and is taken from his new book entitled "More About the Black Bass":

MULTIPLYING REELS.

"The 'Henshall Van Antwerp' reel is manufactured by Thos. H. Chubb, of Post Mills, Vermont. The reel was designed by Dr. Wm. Van Antwerp, of Mt. Sterling, Kentucky (one of the Fish Commissioners of that State), and myself. It is a perfectly symmetrical reel, the end plates being struck up so as to form, with the spool plates, a concavity at each end, in one of which is placed the gearing, and the adjustable click and automatic drag in the other.

"The automatic drag was designed to meet the requirements of those anglers who cannot educate the thumb to control the rendering of the line in casting the minnow. For my own use I prefer, as does any expert, a very rapid multiplier, without click or drag of any kind, in bait fishing; but there are good anglers who cannot, for some reason, successfully acquire the knack of thumbing the spool in a satisfactory manner, and the line will overrun and snarl, and the spool backlash in spite of their most patient and persistent efforts.

"To meet this difficulty the automatic drag acts in the place of the thumb, as the amount of pressure brought to bear upon the spool can be

regulated, automatically, by a sliding button on the side of the reel, and overrunning or backlash being prevented; or the pressure on the spool can be regulated by the lever-drag, or thumb-piece, which operates the same spring as the sliding button just mentioned. With this thumb-piece any amount of tension can be brought to bear upon the spool when casting, or the line stopped, simply by the pressure of the thumb; or when a fish is hooked the tension can likewise be regulated by the thumb-piece from a free-running spool to a light drag, heavy drag, or a complete stop. On the rim of the end plate is an adjustable click, to be used only in fly-fishing. It will hereafter be placed on the same side of the reel as the automatic drag. Either the click or the drag can be operated while the reel is in motion.

"The bearings of the shaft are compensating, by which it can be properly adjusted, or any wear taken up. This compensating principle I know to be a good one, as it is the same as applied to reels about forty years ago by Mr. Snyder, a watchmaker of Paris, Kentucky, and a contemporary of Mr. Meek, of Frankfort, Kentucky. The reels of both of these makers were built upon the same plan, but Mr. Snyder constructed his spool-shaft with conical ends, fitting into screw-pivots with beveled recesses. I examined one of Snyder's reels, a year or two ago, that had been in constant use for more than thirty years, which, by virtue of the compensating device, ran as smoothly as when first made.

"Mr. Chubb's reel is made of the best quality of German-silver, and has steel gears and steel pivots throughout. The wheels and pinions are cut with oblique teeth or cogs, which gives greater power in reeling and more freedom in casting than the ordinary straight cogs."

Since the above was written we have made some changes in this reel, making it much less liable to get out of repair and more durable; we have discarded the old thumb-drag entirely and now put the adjustable click and drag on back-plate; we found that this thumb-drag with spring was apt to get out of order, and by leaving it out gave more room to put in a better adjustable click and drag. These are now put in the same as in the "Par Excellence" reel and are very convenient and durable. All reels made hereafter will be of this style unless otherwise ordered. We will make the old style with thumb-drag if so desired and stated in your order.

"HENSHALL VAN ANTWERP" PAR EXCELLENCE.

FOUR MULTIPLIER. PRICE, \$25.00.

The general appearance of this is the same as the original "Henshall Van Antwerp." The change is mainly in the interior construction. Through the help of Charles W. Shivel, we have succeeded in making a reel which we believe to be the ideal black bass reel. The click and drag are operated by sliding buttons, and the method of setting gears and the construction of drag and click are entirely different; the bearings are agate, so there is no possible chance for wear. The gear is made of gun-metal, and the pinions of hardened steel. By removing the handle side-plate, which is done by removing four screws, the spool can be withdrawn, leaving the frame of reel intact, thus avoiding any displacement of parts in putting reel together again, which sometimes happens with anglers; in fact, the reel cannot get out of repair with ordinary use, and ought and will last a life-time.

PATENT DOUBLE GUT LEADERS.

It has hitherto been quite impossible to make a double gut leader having the two strands bearing an equal strain; this difficulty is now entirely obviated by our new and simple method, which consists in tying each section of gut in a loop, in place of singly, and slipping the loops into each other after the manner of slip knots, so that any two pairs of loops so slipped into each other when drawn taut distribute the stress of tension precisely at or from the central point of each loop, and to unite the strands of gut so as to constitute virtually a thick single strand, thus preventing the excessive splash caused in casting the ordinary double gut leader.

HOLLOW POINT . LIMERICK HOOKS

HOOKS ON GUT.—Extra Fine.

These hooks are all of Harrison's first quality, imported and snelled to our order. Only the best gut is used in their manufacture, and tied by skilled workmen, and we believe that these goods are unequalled for strength and durability.

The twisted gut, 3-ply, is made by twisting together three strands of best quality gut, and is the strongest hook on gut made. For sizes, see drawings of hooks, which are exact size.

We pack hooks in cardboard box, and send by mail, postage paid.

Hooks are in packages of one-half dozen each, and we cannot receive orders for less than one-half dozen of a size.

COMMON FLIES.

We have the following named flies, suitable for black bass and trout, tied on Nos. 2, 4, 6 and 8 Sproat hooks, which we claim to be far superior to many flies that are much higher priced. They are well tied on short but good gut. In ordering, mention size hook wanted. When ordering an assortment of a dozen or more, we place these flies in envelopes, made in the shape of fly hook; each fly is held separate and name of fly printed on envelope; one of the handiest articles out for carrying flies.

Too large and heavy to send by mail. Size, 9 inches long, 6 wide, 5 deep, outside measurements. This case carries one large or two small reels, floats, bluefish squids, sinkers, gangs, snelled hooks, etc., adapted for either fresh or salt water fishing. In cut, 1 and 2 are sliding doors, securely protecting the hooks and flies, and yet always ready for use. No. 3 is a shallow tray, with cross wires for leaders, etc., as shown in pocket case. No. 4 is removable division. No. 5 is a shallow tray; beneath tray 5, at bottom of case, is a division separating it into two parts; one side is provided with cork for gangs, the other is convenient for large sinkers, floats, etc.

AOME (Improved.)

Price\$6.00

Size, 12 inches long, 8 wide, 5 deep, outside measurements. This case carries large and small reels; also a space for almost everything in the tackle line, separately, including flies and snelled hooks, tools for repairs, cigars, or pipe and tobacco. This case will carry all you will probably ever use. In cut, 6 and 7 are trays which fit into space marked 9; the bottom of this space 9 is fitted with cork for gangs, spoons, etc. No. 8 is a shallow tray for leaders, lines, etc., as desired. No. 10 is a removable division; both sliding doors are open in cut, showing arrangement for flies and hooks, similar to the Gem.

VARNISH.

Chubb's Improved Varnish, put up expressly for varnishing fishing rods. This is a superior varnish; it is from hard gum, of good quality; it is old and well settled, light in color, and of good body. One of its strong points is its drying quality. Put up in bottles, enough to varnish three or four rods.

Price.....25 cents.

Sent by mail for 15 cents extra.

DIRECTIONS.—Spread lightly with camel's-hair brush; allow plenty of time to dry. Keep free from dust and wind. If a very thin varnish is desired, thin with spirits of turpentine.

STAIN AND POLISH.

Directions for preparing the wood, and applying our stain and polish: Fill the grain of the wood with whiting and water, mixed to a thin paste; allow the filling to dry before removing the surplus, which can be done with lubricating oil. Dry the surface with a cloth. Apply the stain and polish with a wad made of cotton stocking, until a sufficient number of coats have been applied to give a good body for rubbing down. Give ample time between each coat of the stain and polish to allow it to dry. If a very nice polish is desired, rub the surface smooth with pulverized pumice-stone and water; after drying and removing the pumice-stone, rub briskly with the dry hand, which will give a high polish.

Price of Stain and Polish combined, per bottle.....25 cents.

Sent by mail for 15 cents extra.

DODGE'S FERRULE CEMENT.

This cement was designed especially for fastening fishing rod ferrules, and has many advantages over shellac, gutta percha or rubber cement. It melts at a low heat, flows readily, clings well to wood and metal, and does not become brittle on cooling, in fact is the only successful cement yet produced.

DIRECTIONS FOR USING.—Warm the rod where the ferrule is to be fastened and the cement at the same time, at a flame, rubbing a thin coating on the rod, warm the ferrule and rub some of the cement on the inside with a stick; now warm both rod and ferrule until the cement flows; push the two together as far as wanted and warm again. Wipe off the surplus cement while hot. The rod may be used in five minutes, although the cement becomes firmer if a longer time is allowed. A ferrule may be removed by heating in the flame of a couple of matches.

Price, 25 cents a roll. Made only by T. H. Chubb Rod Co., Post Mills, Vt.
